EXPLANATION

Contour interval 10 meters on continental shelf.
A 20 or 25 meter intervals used where space
does not permit a 10 meter interval. 100 or
500 meter intervals are used below the
300 meter level depending on the density
of data. Dashed lines indicate where data
is sparse. Hachures pointing inward indicate
enclosed depressions in the topography and
hachures pointing outward indicate
isolated high areas.
